# ABOUT OUR COMPANY

Agile Medical Devices Sdn Bhd was officially formed on 23rd September 2021 having injection molding-based consultation, manufacturing and engineering services as its core business activity. We provide end-to-end solutions that includes product research development, equipment fabrication, production, quality inspection, assembly and logistic services.

The company has secured a contracted progressive seed investment of MYR 2,000,000.00 for business startup and initial operations from Cubit Pte Ltd (Singapore) and VNK Ventures Sdn Bhd (Malaysia). Mr. Sara representing Cubit Pte Ltd and Mr. Subaash representing VNK Ventures Sdn Bhd has been appointed as directors & co-investors since September 23, 2021 to lead the startup and form the team. Agile team consists of personnel with vast experience in Manufacturing Industry for more than 20 Years specializing in disposable medical parts and equipment. With our

in-depth experience, knowledge, skill and expertise, we are able to provide our customers a complete One-Stop Solution buying experience – from product conceptualization to its final product manufacturing.

## START-UP GOAL

Agile Medical Devices aims to be market and technology leader for medical industry focusing disposable medical devices and components manufacturing. Having an excellent marketing team and customer services, we wish to expand the customer base both locally and internationally by end of Year 2023. We are confident and fully committed in giving our level best to achieve the goals set via continuously improving & adding cutting edge machines, facilities and customer service.

## PARTNERSHIP

*We always believe that more hands are better than one. We have partnered with industry leaders at their respective fields in order to successfully set-up the factory ready for operation.*

### **CM MACHINERY SDN BHD**

Sole distributor of Haitian Machines for Malaysia. Orders placed for 6 brand new high-tech Haitian servo machines. We believe machineries are the back-bone of any manufacturing industry. Therefore, the management has decided to purchase only brand-new machines in order to avoid unnecessary down-times to repair.

### **ACE GROUP CONSULTANCY**

We have appointed them as our ISO consultant for preparation of ISO 9001:2015 & ISO 13485 certification.

# OUR SERVICES

## 1. Design, Research, & Development

*Our key expertise and capabilities start with Tooling design. Manufacturing design is a crucial process and promotes manufacturability of a robust product and helps an organization to determine the cost of production, quality and directly related to the products success and profitability. We guide our consumers on below matters:*

1. Product and Process design validation
2. Design consultation that emphasizes on easy and effective mold design, reduced maintenance efforts and consistent quality
3. Mold simulation Services
4. Prototyping

## 2. Tooling/Die Design

1. Experienced mold design and makers team. Precision tooling and machining expertise
2. 2d/3d design and mold flow validation for customer pre-evaluation
3. Design focusing on shortest lead time with maximum output
4. Software:
  - i. Solid works 2018
  - ii. Moldex3D
  - iii. DraftSight Premium

## 3. OEM or Contract Manufacturing

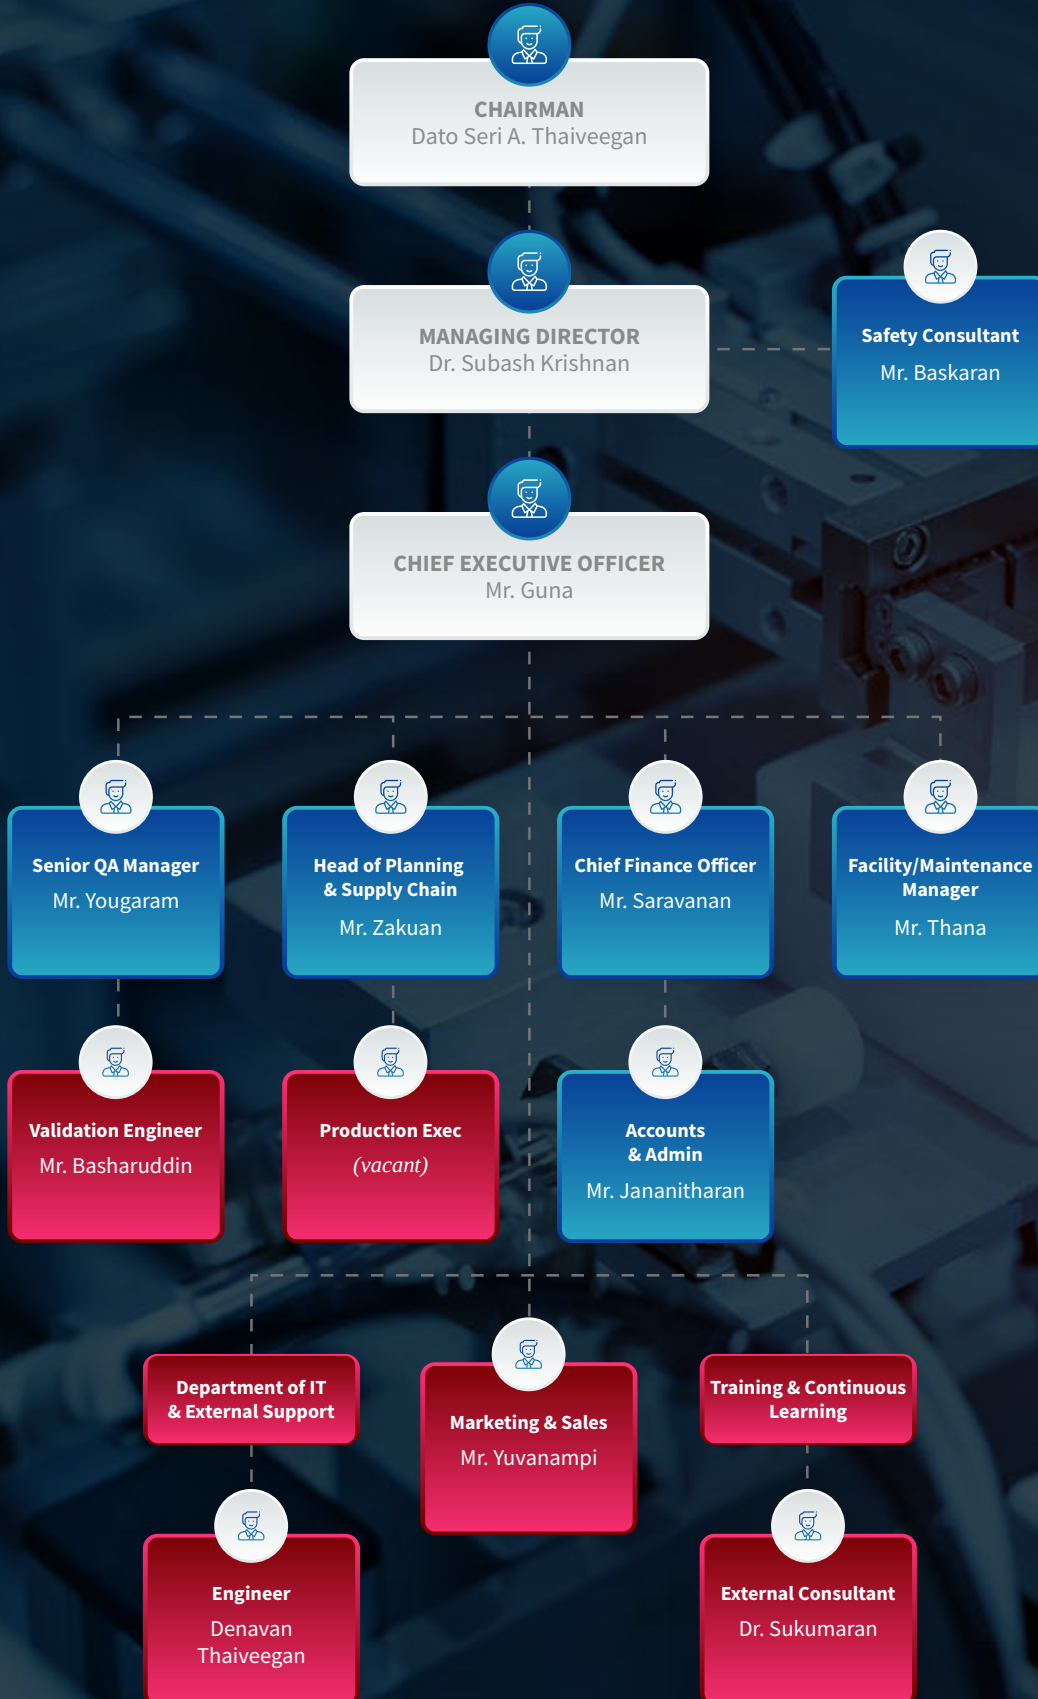

We are to be equipped with multiple state of the art latest tech machinery and facilities that capable of large scale and multi-variety manufacturing. Our manufacturing process is carried in a controlled room environment to ensure and maintain deliverables quality.

Every customer need could be different. Therefore, we are always committed to fulfill customers requirements at any cost including adding required machineries or facilities in order to deliver the expected output.

# MEET THE TEAM

*Agile Medical Devices Sdn. Bhd. Organization Chart 2022*

## KEY PERSONNEL AND EXPERIENCES

### *Mr. Saravanan Vimalanathan*

- 20 years of semiconductor wafer fabrication manufacturing experience.
- Completed technology transfer from LSI logic USA to Silterra Malaysia focusing into Ion Implantation Equipment Technology.
- Completed Technology Transfer and Startup from IMEC Belgium to Chartered Semiconductor Singapore.
- Carried out Duty as Operations Director in Cubit Pte Ltd Singapore and Cubitjaya Malaysia focusing into Technical Sales.

### *Mr. Guna*

- Injection molding specialist in medical device and semi-conductor molds
- Managed more than 300 molds with 30 years of experience in injection molding
- Experience in injection molding and extrusion.
- Vast experience in ISO 13485 & ISO 9001 and manufacturing cost reduction.
- Great knowledge in solid work & 2D/3D drawing.

### *Mr. Yoga*

- 10 years of experience in Quality Management System
- Experience in ISO 13485, ISO 9001, ISO 14001, FDA & Risk Management
- Experience Management representative for third party audit & customer audit
- Established knowledge in continuous improvement
- Vast experience in medical device & semi-conductor products

## QUALIFICATIONS AND CERTIFICATIONS

*Agile as an organization considers certification and qualification documents as crucial element that proves our capability and commitment. Therefore, we have initiated the below process:*

1. ISO 9001:2015
2. ISO 13485
3. Ministry of Finance License (MOF)
4. MITI Exemption

# MACHINERIES

## INJECTION MOLDING MACHINES

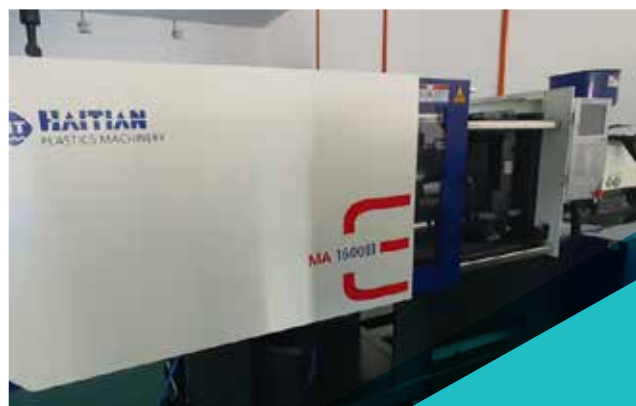

**01.** NEW HAITIAN  
SERVO 120T - 2 UNITS

**02.** NEW HAITIAN  
SERVO 160T - 2 UNITS

**03.** NEW HAITIAN  
SERVO 250T - 2 UNITS

### PRODUCTION FLOOR

*\* Note: The pictures are for illustration purposes only and very closely resembling our actual production area once machine installation and commissioning completed*

## QA TOOLS

1. Smart scope
2. Tensile strength machine
3. Ring & Plug gauge
4. Digital Caliper
5. Height gauge
6. Pin gauge
7. Ruler
8. Filler gauge
9. Tapper gauge
10. Granite table
11. Micrometer
12. Pantone colour code book
13. Shore A & D gauge
14. Weighing machine
15. Temperature & Humidity data logger
